

Fraction Pathway Challenge

Objective: To trace a path from Fraction A to Fraction B

Method: A traveller may advance from one fraction to any connected fraction that is smaller.

Alternative Suggestions:

- 1) Start at Fraction B and trace a path to Fraction A by connecting to a larger fraction.
- 2) Determine whether there is more than one possible path.
- 3) Use three different colours to show
 - i) fractions greater than one-half,
 - ii) fractions equal to one-half,
 - iii) fractions less than one-half.
- 4) Create a different game using this game board template.
